Research & Publication

We believe education is the most vital to civilize and develop a nation. Traditionally, muslims individually and

academically have an notable attention as regard library. Our source of inspiration Allama Abdul Motin Chowdhury was a bookish and fond of library. So we would like to intend as to how make a library with the name of father of Allama Fulbari **Rezwanuddin library**. There will be, as our expectation thousands of books on several issues of Islam, such as Quran, Hadith, Fiqh, Tafsir History and monthly, yearly fortnightly magazines.

In addition, we have published five books from the foundation. We have our own researchers and writers. So writing and publishing books on Islam and humanity is our continuous process.

Future Plan:

We would expect to make **13 schools** for orphans and street children in poorest areas of Sylhet district of Bangladesh.

Health Support:

We feel proud as we respond to some poor patients. Foundation donates cash money as per its ability to poor patients. In future we hope to work in wide area of health support. To carry on this project primarily ambulance service is very important. We may expect soon our donor brothers and sisters pay **attention to buy ambulance.**
